

Chinaccelerator backs 10 companies in its 19th cohort, betting on FemTech, SaaS, Creator Economy, AI & NFT

Chinaccelerator, SOSV's Shanghai-based startup accelerator, is set to graduate its 19th cohort on its Demo Day on June 2nd, 2021. With a major focus on cross-border Internet in Asia, Chinaccelerator has so far invested in and accelerated over 170 startups and is the first and only active accelerator in Asia to have a unicorn, Bitmex from Batch 8 (Fall 2015), go through its program.

The 19th cohort of 10 early-stage startups are headquartered in India, United States, Russia, South Korea, China, Canada, London, Singapore, and Indonesia, and leading the next waves of developments in **FemTech, SaaS, Martech, creator economy, PropTech, Computer Vision, blockchain and more.**

These startups include some who are already profitable with over 1.5 million global MAUs, have achieved 3x growth of revenue in less than 3 months, and working with over 1,000 global brands as their clients. Chinaccelerator has supported the startups with business strategy, growth hacking, business development, building traction in a scalable way, as well as fundraising.

Chinaccelerator's Partner and Managing Director Oscar Ramos says, "Digital transformation has been a buzzword for a few years, but not everyone manages to walk the talk. As more organizations realize that and take options, more interesting opportunities are opening up for startups that are transforming the world and enabling change. We are very excited about the current batch that shows examples across multiple industries and involves SMEs, large companies and individuals."

About Chinaccelerator:

Chinaccelerator, Asia's leading startup accelerator, is a mentorship-driven program helping enterprise software startups from around the world enter Asia selling to a network of over 200 multinational corporate partners, and global startups enter China and local Chinese startups expand to global markets. It is operated by the venture fund SOSV with \$855M+ AUM operating five global accelerators. Chinaccelerator offers three months of rigorous guidance, training and resources from mentors, partners and investors. The robust and supportive alumni network continues beyond the Chinaccelerator program.
